

PRESS RELEASE

15 October 2024

AVAILABILITY OF ALTOVA PRODUCT RANGE

1. Vita Technologies and Solutions (VitaTech), a Singapore-based technology company, has reached an agreement with Altova GmbH (Altova), an Austrian company from Vienna, on the distribution and availability of XML, Data Integration and Mobile Development Solutions in Singapore and ASEAN. With expertise in software development, server software, regulatory solutions and cloud apps from Altova, VitaTech customers will enhance technical capabilities in their value-creation process.
2. VitaTech is happy to announce the availability of the following products and solutions to its customers and Value-Added-Resellers (VARs):
 - a. Altova MissionKit- Software development suite of XML,JSON, SQL and UML Tools (includes other products)
 - b. XMLSpy - World's leading XML designer (with AI assistant). Supports XML, JSON, YAML, XSLT, XPath, XQuery, WSDL, SOAP, XBRL, OOXML, Avro, Markdown and more.
 - c. MapForce - AI-ready any-to-any, graphical data mapping tool for data integration and ETL. Converts between XML, JSON, PDF, database, EDI, XBRL, CSV, Excel, Protobuf and webservice.
 - d. StyleVision - Designs reports based on XML, database or XBRL inputs.
 - e. UModel - Designs application models (for C#, Java, C++, VB.NET apps). Can also reverse engineer existing apps to UML.
 - f. DatabaseSpy - Multi-database query, design and editing tool with a built-in AI-Powered SQL Assistant.
 - g. DiffDog - Tool for comparing files, directories and databases.
 - h. SchemaAgent - Visual tool to analyze and management relationships amongst XSDs/XML files.
 - i. Authentic - WYSIWYG XML authoring and editing tool.
 - j. MobileTogether - Low-code app development framework that builds native apps and enterprise solutions (platform neutral) with AI-powered database creation tools.

Servers:

- k. FlowForce Server - Optimized Server for high performance automation of data processing, data transformation and report generation. Automates execution for all other servers.
- l. MapForce Server - Optimized Server for high performance data integration. Automates data transformation.
- m. StyleVision Server - Optimized Server for reports generation (XML,Database,XBLR) in web and print format.
- n. DiffDog Server - Optimized Server for combination of files and directory combination (high volume).
- o. RaptorXML Server - Optimized server for hyper-fast XML, XBRL,JSON,YAML validator and processor.
- p. MobileTogether Server - Optimized server MobileTogether backend (designer). Gateway for mobile users and mobile infrastructure assets.

Reporting:

- q. CbC Reporting Solution - Cloud-based country-by-country (CBC) reports.

Plug-ins:

- r. EBA XBRL add-in for Excel - Allows creation of European Banking Authority (EBA) compliant reports.
- s. ESEF XBRL add-in for Excel - Allows creation of ESMA filing standards report creation.
- t. EIOPA XBRL add-in for Excel - Allows creation of Solvency (II) XBRL compliant reports.
- u. WIP XBRL add-in for Excel - Allows contractors to create WIP reports in XBRL format.

Solutions:

- v. GDPR Compliance Database - solution to track GDPR compliance.

Software:

- w. RecordsManager - No-code, AI-powered database development tool.
- x. ContractManager - Cloud based contract management.

Mr. Roger Portman, VitaTech General Manager (Distribution) opined, *“Altova probably has one of the most proven solutions portfolio in the area of data design and parsing. It will provide our customers and partners with the best tools-of-class available for data design in the most popular contemporary static, passive, persistent storage formats. We highly value this addition to VitaTech’s proven product portfolio.”*
